

SMARTSTICK™

Integrated Pallet and Product Tracking

- Protects tag from forklift tine impact
- Protects tag from direct product load contact
- Protects against accidental tag loss or damage
- Deters intentional tampering
- Protects tag from the elements
- Performs well in hot and cold climates
- Fastens securely to a standard pallet
- Does not compromise the integrity of the pallet unit
- Improves the readability of tag data
- Reusable

Patent Pending

The SmartStick™ provides a quick, inexpensive, reliable, and permanent method of mounting RFID tags and sensors within the deck plane of the pallet. Made from high impact, UV resistant resin and mounted securely to two or more stringers or blocks between existing deckboards, the SmartStick™ is protected from forklift or load damage, providing improved tag readability. The SmartStick™ from HPE is revolutionary, patent-pending technology.

Benefits of RFID

- Meets customer and DOD compliance requirements for RFID enabled pallets
- Can accommodate virtually any RFID tag or sensor
- Attaches to any pallet using conventional nails
- Easily integrated into pallet manufacturing and repair operations
- Improved tag readability yields more accurate product tracking
- Overall lower supply chain costs and higher earnings for customers
- Low cost solution
- Phytosanitary (ISPM 15 Compliant) for international shipping
